

RACEBIKE STK

FULLY ASSEMBLED AND RACE-READY MOTORCYCLE BY ALPHA RACING.
MODEL RC-STK-S

TECHNICAL DATA

Capacity/engine	999cc, four-cylinder four-stroke engine with four titanium valves per cylinder and variable intake camshaft control BMW ShiftCam, liquid-cooled, by BMW Motorrad
Frame	Aluminum composite bridge frame, partially self-supporting engine, by BMW Motorrad
Output	152 kW (207 hp) at 13,500 rpm
Bore x Hub	80 x 49.7 mm
Compression ratio	13.3:1
Gearbox	Constant-mesh 6-speed gearbox with straight cut gears
Electronics	M Race Calibration Kit, by BMW Motorrad Motorsport
Tank capacity	16.5 l
Lubrication	Wet sump
Dry weight	166 kg
Wheelbase	1,441 mm
Length	2,050 mm
Width	538 mm
Front wheel control	Upside-down telescopic fork, Öhlins NIX30 cartridge kit
Rear wheel control	Underslung swing arm, full-floater central spring strut Öhlins TTX GP
Front brake	Dual floating disc brakes, 4-piston fixed calipers, diameter 320 mm
Rear brake	Single disc brake, diameter 220 mm, single piston floating caliper
Exhaust system	4:2:1 Racing exhaust system, by Akrapovic
Wheels	Aluminum forged wheels, by BMW Motorrad
Tyres	Diablo SBK slicks, by Pirelli

RACEBIKE STK

FULLY ASSEMBLED AND RACE-READY MOTORCYCLE BY ALPHA RACING.
MODEL RC-STK-S

PARTS LIST

Engine	Clutch cable Motorsport Engine cover protection kit, by GB Racing Cover kit SAS Cover secondary air system Oil filler plug kit Magnetic oil drain plug Plug kit throttle valve body Airbox intake plug kit Advantec Ultimate 5W40 engine oil, by BMW Motorrad
M Race Calibration Kit	MoTeC CI25 dashboard GPS antenna, GPS-L10 Bracket GPS antenna Oil pressure switch Switch unit left 5 button Switch unit right on throttle E-throttle kit SBK Conversion kit ON/OFF switch Fast shift sensor USB connecting cable USB 3.1 Flash Drive Rainlight switch Rain light kit SBK Speed module
Fuel tank	Fuel tank cap Fuel tank foam cubes Fuel tank lock bolt with clip
Cooling	Radiator hose kit, by Samco Sport Radiator protection fence Radiator cap 1.8 bar
Exhaust	4:2:1 Exhaust system Racing Line, by Akrapovic Muffler bracket carbon
Final drive	Front sprocket 520 Rear sprocket aluminium 520 Racing chain 520, by D.I.D. Sprocket lock washer
Steering	Clamps for upper triple clamp Racing handlebar kit Handlebar grips, by HRC Brake lever guard Remote adjuster for brake lever Clutch lever long Brake lever long Steering damper SD 038, by Öhlins Spacer steering damper
Front fork	Cartridge Kit NIX30 (FGK 240), by Öhlins Cover for OEM upper triple clamp Reservoir sock cover
Rear shock	Rear shock TTX GP, by Öhlins
Brake system	Brake pad set, Duo sinter Front brake discs 320 x 6 mm Brake line set, front Brake line, rear
Frame & Accessories	Dashboard and fairing carrier, aluminium welded Racing subframe, light Racing rearset Steering stopper kit Crashpad kit

RACEBIKE STK

OPTIONAL EQUIPMENT AND SERVICE PACKAGES.
MODEL RC-STK-S

SPECIAL EQUIPMENT

Performance Package

The Performance Package contains optimized racing components for improved engine performance. The air intake is a direct development from the BMW Motorrad WorldSBK Team and ensures an improved air flow to the airbox, together with the specially developed BMC air filter, there is a significant increase in engine performance. The package is complemented by a finely working, fully adjustable slipper clutch from Suter Racing.

- Air intake kit SBK
- Racing air filter type D, by BMC Air Filter
- Slipper clutch racing, by Suter Racing
- Clutch cable kit Motorsport

+ 1.900,00 € net.

Pro Race Package

The Pro Race Package offers racing-optimized components that improve handling and longevity on the racetrack. The gear position sensor, the vibro polished quick release axles and the special linkage bolt for the swing arm linkage are designed for increased durability and performance. The practical fuel drain kit makes it easier to empty the fuel tank and thus work on the bike.

- Racing gear position sensor
- Quick release rear and front axle
- Special bolt linkage
- Fuel drain kit

+ 500,00 € net.

Sensor Package

The Sensor Package contains high quality sensors for suspension and brake pressure that are specifically tailored to racetrack use. This forms the basis for a professional analysis of suspension elements and riding dynamics. The suspension sensors from 2D are race-tested and are installed in lengths of 175/100 mm (front/rear). The brake pressure sensors for the front and rear brakes are also from 2D. All sensors are adapted to the motorsport kit wiring harness of the M Race Calibration Kit.

- Linear potentiometer front & rear, by 2D
- Brake pressure sensors front & rear, by 2D
- Assembly material

+ 1.700,00 € net.

Carbon Package

The Carbon Package wraps the bike in high-quality carbon. All bodywork components are replaced by aerodynamically optimized prepreg carbon parts. The perfect weight-to-strength ratio ensures increased protection for parts that are sensitive to falls, as well as increased performance thanks to the weight savings.

- Carbon bodywork kit 4-piece
- Carbon front fender
- Carbon airbox cover
- Carbon race tail incl. seat
- Assembly material

+ 2.000,00 € net.

UPGRADE OPTIONS

Öhlins TTX 25 cartridge kit FKR 122

+ 748,20 € net.

Akrapovic Evolution Line

+ 535,50 € net.

Brembo radial master cylinder 19RCS

+ 295,00 € net.

Carbon protection kit (frame & swingarm)

+ 500,00 € net.

Front brake air ducts

+ 600,00 € net.

ADDITIONAL EQUIPMENT

Pitbox Package

The package contains many practical service products for use on site at the racetrack. In addition to the interface components for the bike electronics, the package includes special tools for setting the bike geometry, a high-quality tyre warmer set, assembly bike stands and other accessories for the perfect appearance in the pitbox.

- M Race Calibration Kit Interface Module
- Enet interface cable for Motec dashboard, Ethernet/OBD2
- Front bike stand
- Footrest support stand kit
- Ride height tool kit
- Handlebar tool
- Laptop support tool
- Assembly assistance front axle
- Tyre warmer kit >EVO< Superbike
- Bike carpet
- Bike cover

+ 1.700,00 € net.

Drive Train Package

The Drive Train Package offers a variety of transmission options (final drive) for different racetracks and driving styles. The package includes three different chain sprockets (15-17) and aluminum sprockets from 40 to 46 teeth. Also included are an additional racing chain from D.I.D. pitch 520, a matching chain lock and a sprocket lock washer.

- Front sprockets, T= 15/16/17
- Rear sprockets, T= 40/41/42/43/44/45/46 (for OEM wheels)
- D.I.D. racing chain 520
- Chain lock

+ 500,00 € net.

Spare Wheels Package

The Spare Wheels Package offers a complete set of replacement wheels from OZ Motorbike. The aluminum wheels are delivered pre-assembled and are equipped with brake discs, sensor rings for the wheel speed and sprocket carrier. A set of aluminium sprockets from 41 to 45 teeth completes the package and allows a wide variety of transmission options.

- OZ Motorbike Gass SBK wheel set 3,5"/6,0" x 17"
- Brake discs front, 320 x 6 mm
- Brake disc rear, 220 x 4 mm
- Rear sprockets, T= 41/42/43/44/45 (for OZ Motorbike wheels)
- Wheel speed sensor rings
- Assembly material

+ 2.700,00 € net.

SERVICE PACKAGES

Setup Package

This service package includes an individually tailored racebike and an introduction to the software management of the M Race Calibration Kit. Personal training to the extensive motorsport kit electronics (M RCK) as well as a mapping individually tailored to the customer. In addition, the suspension elements and the ride height are adapted to the rider.

- M Race Calibration Kit training
- Individual ECU mapping
- Suspension setup
- Ride height setup

+ 800,00 € net.
